I drive tractor trailers over the roadways of this country and the traffic and weather channels have become a must as our jobs are on such time constraints that any and all help is greatly needed. Please don't remove these channels instead please add more. The more the better. I would also like to see channels that have live sporting events like hockey, baseball, football, etc.. we do have nascar and it's great. please remember there are a lot of people in the country that are keeping this country going by moving goods across this country 24hrs a day 7 days a week who aren't able to watch tv like those who have a 9-5 job. Without drivers like myself and all the others where would this country be? In serious trouble please help us don't hurt us thank you for this opportunity to speak my mind.
